Hexistat® Germicidal Wipes

The Portable Germ Destroyer

Alcohol-free **Hexistat Germicidal Wipes** destroy most known bacteria, microbes and viruses - straight out of the pouch. Developed exclusively for law enforcement and emergency personnel. Hexistat Germicidal Wipes come in easy-open pouches for maximum portability and convenient use in the field. Hexistat Germicidal Wipes germ-destroying formula eliminates the need for alcohol, a common ingredient in other germicidal products that causes skin irritation and other toxicity problems. Hexistat Germicidal Hand Wipes use Chlorhexidine Gluconate and Benzethonium Chloride, **non-toxic alternatives that provide fast-acting protection against harmful micro-organisms**. As an added benefit, the formula safely bonds to the skin, offering an invisible layer of protection that typically lasts several hours.
