

# Destroy Germs Anywhere

## Hexistat® Germicidal Wipes

### *The Portable Germ Destroyer*

Alcohol-free Hexistat® Germicidal Wipes destroy most known bacteria, microbes and viruses – straight out of the pouch. Developed for people on the go, Hexistat® Germicidal Wipes come in easy-open pouches for maximum convenience and portability. Hexistat® Germicidal Wipes' germ-destroying formula eliminates the need for alcohol, a common ingredient in other germicidal products that causes skin irritation and other toxicity problems. Hexistat® Germicidal Wipes use Chlorhexidine Gluconate, a **non-toxic alternative that provides fast-acting protection against harmful micro-organisms**. As an added benefit, the formula safely bonds to the skin, offering an **invisible layer of protection that typically lasts several hours**.
